- France

I make ideas tangible: framing and onboarding workshops, interactive prototypes and demonstrators in XR, 3D and generative AI, innovation project leadership. Inside innovation labs since 2016, from early framing through to the live demo, as Tech Lead or Product Owner. Now independent and available for short or long assignments.

■ EXPERIENCE

2025 →

Freelance

Innovation Engineer

- Framing and onboarding workshops, interactive prototypes, project leadership. Roblox, mobile AR with Flutter, vibe coding and agentic development.

2023 – 2025

Accenture · Liquid Studio Paris

Team Lead · Digital Experience

- Led a team of 6 engineers and designers: AR/VR, 3D, NLP, generative AI.
- Tech Lead from prototype to demonstrator for industry, defence and transport clients. Technical roadmap, timelines and budgets.

PolarPod 3.0 2024

Science outreach: 3D scenes, content, AI voicebot. React, Three.js.

- Moved from demonstrator to public product, still live today.

Axel Agent 2023

Voice LLM agent in a real-time 3D set. Unreal, Looking Glass.

- The studio's first pairing of generative AI and real-time 3D.

Offer To Design VR 2023

Aircraft cabin configurator in standalone VR. Unity, Meta Quest 2.

- Client showcase at the Paris Air Show, built to hold up on the show floor.

2021 – 2023

OCTO Technology Paris

Consultant · User Interfaces AR / VR

- Consulting and development of AR / VR interfaces for large accounts.

Augmented Worker 2022

Connected Worker AR: digital twin, guided procedures, remote assistance. Unity, MRTK.

- Modular architecture: the demo adapts to each client.

2017 – 2021

Webnet Paris

R&D and development engineer

On assignment at Thales Research & Technology

R&D Engineer · Innovative User Interfaces

- Explored technical topics for various group entities: needs framing, state-of-the-art reviews, technology watch reports, demonstration prototypes.
- Immersive AR / VR experiences in Unity (C#): HoloLens 1 & 2, Oculus Rift & Quest, HTC Vive. Conversational agents (NLP, NLU) and multimodal interfaces.

Armaldo 2019

AR anchored on the physical mock-up of a military pod. Unity, HoloLens.

- First AR anchoring on a real physical object, shown at the Paris Air Show.

In-house innovation unit

Alongside the Thales assignment

- Apps for internal events, interactive installations and demonstrators, technology watch and written articles (blockchain).

AirDraw Challenge 2020

Kinect v2 body tracking, AI drawing recognition. TensorFlow.js.

- Complete real-time pipeline, from sensor to model. DevFest, Symphony Live.

2013 – 2016

Internships

Manzalab · IT-CE (BPCE) · Netgem, London · Applidium · Orange

- Development, UX/UI design, eye-tracking R&D, project management.

EDUCATION

2012 – 2016

École Centrale de Nantes

MEng, general engineering, computer science major. Highest honours.

2010 – 2012

Lycée Jeanne d'Albret

CPGE MPSI · MP, Saint-Germain-en-Laye

SKILLS

XR

AR / VR · HoloLens 2 · MRTK · Looking Glass · Aximmetry

REAL-TIME & 3D

Unity · Unreal Engine · Roblox · Blender

AGENTIC DEV

Claude · vibe coding · coding agents

WEB & MOBILE

React.js · Three.js · Flutter · Node.js · Prismic

METHODS

Design thinking · facilitation · Tech Lead · Product Owner

LANGUAGES

French

native

English

professional working

MAKING & VISUAL ARTS

Visual arts

Drawing, painting, watercolour, life drawing, 3D modelling.

Sewing & pattern-making

Made-to-measure design and construction, from pattern to finished piece.

Fablab & making

Active member of a municipal fablab: scale modelling, 3D printing.
